

Brush Holder Magazine Rebuild Experts

**Helwig Carbon Products, Inc.
are specialists in rebuilding
brush holders.**

Following are the steps we take when rebuilding the GE turbine magazine bank of four and bank of six brush holders shown here.

1. Disassemble entire magazine, clean and tumble all metal parts
2. Check and adjust all boxes for proper fit and clearance of brushes.
3. Silver plate brass brush holder and assembly if required. *(additional cost)*
4. Replace back plates, springs and terminal screws.
5. Replace stainless steel brush retaining plate if required. *(additional cost)*
 - a. Machine bottom of magazine for short brush retainer plate *(if applicable)*
6. Reassemble magazine
