Brush Holder Magazine Rebuilds

- Experts in rebuilding brush holders
- Quick Turnaround
- Rebuilds are a fraction of the cost of replacement

Following are the steps we take when rebuilding the GE turbine magazine bank of four and bank of six brush holders

1. Disassemble entire magazine. Clean and tumble all metal parts.
2. Check and adjust all boxes for proper fit and clearance of brushes.
3. Silverplate brass brush holder and assembly, if required (additional cost).
4. Replace backplates, springs, and terminal screws.
5. Replace stainless steel brush retaining plate, if required (additional cost).
Machine bottom of magazine for short brush retainer plate (if applicable).
6. Reassemble magazine.
