

New Grounding Brush/Labyrinth Seal Technology

Helwig Carbon and Orion Engineered Seals come together to create a combination seal/grounding device for the motor industry. Discover the innovative grounding technology that keeps lubrication in and contaminants out.

Unmatched Reliability

Failure is not an option for critical applications and correct brush design and carbon grades are crucial for optimal performance. Helwig and Orion have the experience and resources you can depend on.

- 100% elimination of stray current
- Preassembled and engineered to fit any shaft size or application
- Works on all shaft finishes
- Effectively handles a wide range of currents
- Grounding brush is fully enclosed and protected from the environment and elements
- No Horse Power limitations

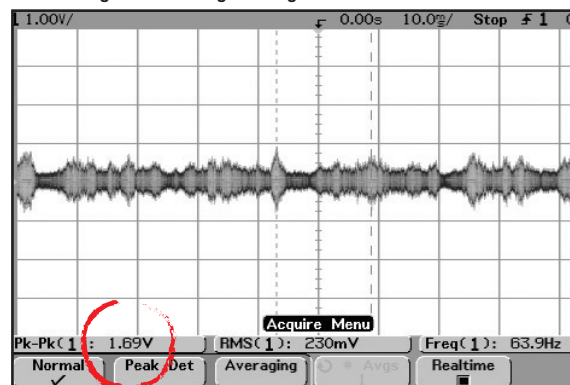

Ideal Performance and Flexibility

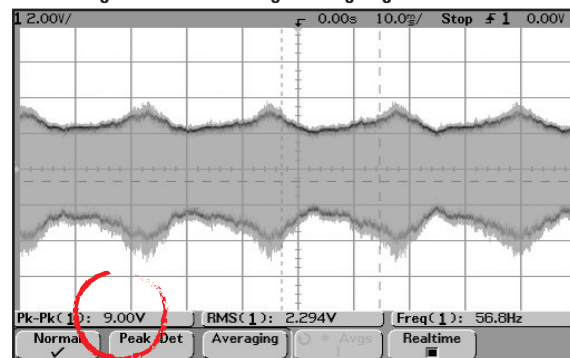

- A unique combination of a labyrinth seal and proven grounding brush technology for bearing protection
- Compact size for internal mounting
- Ideal for contaminated environments
- Available in any size and easily adapted to any motor
- Made in the USA
