# Bearing Protection Kits (BPK) to Fit Motors of All Sizes

Helwig's, *UL approved*, Bearing Protection Kits fit a variety of motor shafts, offer several mounting options, and are easy to install & maintain.

They deliver years of superior performance, and **typically outlast the unit they're installed on.**

## Bearing Protector Kit Selection Guide

| Shaft Diameter | BPK-IM2    | BPK-4      | BPK-AM     |
|----------------|------------|------------|------------|
| <25mm (<1")    | Single Kit | -          | -          |
| <50mm (<2")    | Single Kit | Single Kit | -          |
| <75mm (<3")    | 2 Kits     | Single Kit | -          |
| <100mm (<4")   | 2 Kits     | Single Kit | -          |
| <125mm (<5")   | -          | 2 Kits     | Single Kit |
| <150mm (<6")   | -          | 2 Kits     | Single Kit |
| <175mm (<7")   | -          | 2 Kits     | Single Kit |
| 200mm (<8")    | -          | 2 Kits     | Single Kit |
| <225mm (<9")   | -          | 3 Kits     | 2 Kits     |
| <250mm (<10")  | -          | 3 Kits     | 2 Kits     |

Mount 2 kits at 90° or 3 kits at 120° for reliable contact in case of vibration or shaft run out. For larger diameter shafts, increase contact area with more holders or larger holders.

Choose single kit options for economical grounding protection, or multi-kit options for more contact surface and optimal grounding protection.
